

PolarPlex™ Curtains

Product Information Sheet

PolarPlex™ Strip Curtains and Softwall Panels

Polargy's PolarPlex™ Strip curtains and softwall panels are an effective, low cost solution for hot and cold aisle containment. The curtains install quickly, seal well, and are a durable solution for isolating hot exhaust air from cold supply air.

Quick, Pain-Free Installation

The PolarPlex™ Curtains and Strip Doors install quickly and with little site disruption. The modular, fast mounting system accommodates site variations which saves on installation labor. Mounting channels attach easily to the T-bar grid with Polargy's special "P-Clip". The curtains, which feature a hookbead mounting lip, are easily and securely hooked onto the aluminum mounting channel.

Easy Mount "P-Clip"

Electronic Fuse Links

Sealed Corners

Wrap around welded seam pieces eliminate loss at the corners.

Fast Mounting System

The mounting channels are clear, anodized aluminum available in either Flat Wall or InJam forms.

Vinyl Options

Polargy's vinyls are formulated to be fire-retardant and low-outgassing. Two fire rating options are Class A and Class C, both are ESD safe.

Custom Sizes

Curtains are cut to length for each unique site and rack height.

Fire Safety

Thermal release fuse links and electronic fuse links are available as options to avoid moving or adding sprinkler heads.
