

PolarDAM™ Air Dam Skirts

Easy magnetic or velcro installation

Energy Efficient

PolarDAM™ air dam skirts maximize air conditioning by keeping cooling air where it belongs. They assure containment of cold air by prevent bypass air around racks, PDUs and other floor mounted equipment.

Easy to Deploy

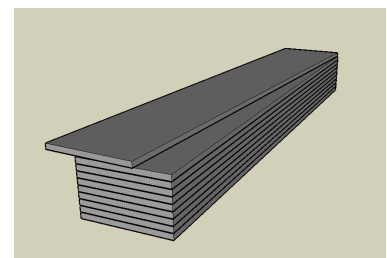

The PolarDAM™ air dam skirts are 3.5" x 24" black base boards designed to fit along the front of server racks and block bypass air. They attach easily with either a magnetic or velcro strip. The material is 62 mil thick and can be cut with heavy scissors to make alternative sizes. The skirts come in boxes of ten.

Data Center Safe

The PolarDAM™ air dam skirts are fire retardant and meet the UL rating of UL-94-V0. The fire retardant polypropylene material is strong, chemical resistant and does not absorb moisture. RoHS compliant.

PolarDAM™ air dam skirts are either magnetic or velcro backed.

PolarDAM™ air dam skirts are delivered in boxes of 10.
