

KOLDLOK[®] Wave

MAXIMUM EFFICIENCY

Achieve maximum efficiency in your data center with the KoldLok Wave™, the best sealing grommet on the market. The many features of the KoldLok Wave™ make it the best investment for your money, offering the fastest ROI and longest lifetime value.

SEALING EFFECTIVENESS

New, patent-pending wave shaped thermoplastic elastomer offers the best sealing against bypass airflow, unsurpassed by any brush grommet on the market.

USABLE CABLE AREA

Offers 169% more usable open area than a leading competitor.

VERSATILITY

Split design allows edge-cut tiles to be removed without capturing cables.

MAINTENANCE FREE

Wave shaped material seals and re-seals around cables with no additional maintenance or monitoring required.

EASE OF INSTALLATION

Simple, installation saves time and labor; install it and forget it.

LONGEVITY

Durable ABS frame and flexible sealing surface engineered to withstand long-term use.

DESIGNED FOR SAFETY

Thermoplastic elastomer material is flame rated UL94-HB, and an optional cover is available.
